

## Containers FCL vs. LCL

## Trucks FTL vs. LTL

- FCL = “Full Container Load” You pay for a whole container of your own.
- LCL = “Less than Container Load” Your goods will be loaded into a shared container.
- FTL = “Full Truck Load” You pay for a whole truck of your own.
- LTL = “Less than Truck Load” Your goods will be loaded into a shared truck.

### Pros of FCL over LCL:

- Greater security - fewer people will have access
- Faster through customs - less risk of delay from someone else
- Can load and seal your container on your own premises

### Cons of FCL vs LCL:

- More expensive for a partial load
- Probably have to send all the goods to a single destination
